Panasonic serves up speedy scanner

Panasonic has launched two new high-speed scanners which can process numerous documents of different thickness and size at the same time.

With high-speed duplex scanning, the KV-S1057C can scan 65 pages per minute whilst the KV-S1027C can scan 45 pages per minute. 100 sheets can be placed on the automatic document feeder using a gate mechanism which avoids paper feed problems and skewing.

The compact size of the scanner allows it to conveniently fit into small spaces, whilst a document feed specifically designed for IDs and passports makes it particularly suitable for hotel receptions.

Panasonic Product Marketing Manager, Carlos Osuna said, "The new scanners are suitable for a variety of applications in businesses small or large. The unique document feed system helps save staff time whilst allowing various documents, from paper to plastic cards, to be scanned simultaneously, helping reduce hassle.

"Compared to other desktop scanners in its class, Panasonic's KV-S10X7 series proves to be the fastest in operation as well as being able to hold the most documents for scanning at one time. Alongside that, its stylish, compact design makes it a great desktop scanner."

One-touch scanning allows settings to be made with a single button, with up to 100 job settings stored; suitable for those who scan documents repeatedly.

The new scanner can process paper with various thicknesses, from 20gsm to 413gsm, embossed ID cards, passports and more.

About Panasonic System Communications Company Europe (PSCEU)

PSCEU is the European branch of Panasonic Systems Communications Company, the global B2B division of Panasonic. PSCEU's goal is to improve the working lives of business professionals and help their organisations' efficiency and performance. We help organisations capture, compute and communicate all sorts of information: image, voice, and textual data. Products include PBX telephone switches, document printers, professional cameras, projectors, large visual displays, rugged mobile PCs and fire alarms solutions. With around 400 staff, engineering design expertise, global project management capability and a large European partner network, PSCEU offers unrivalled capability in its markets.

PSCEU is made up of four product categories:

- Communication Solutions, including professional scanners, multifunctional printers, telephony systems and SIP terminal devices.
- Visual System Solutions, including projectors and professional displays. Panasonic offers the widest range of Visual products, and leads the European projector market with 28 % revenue share. (Futuresource B2B market tracking, Q1/2014)
- Professional Camera Solutions, including Broadcast & ProAV products, security, fire alarm systems and industrial medical vision (IMV) technology. Panasonic is one of the top two professional camera vendors in Europe.
- Computer Product Solutions helps mobile workers improve productivity with its range of Toughbook rugged notebooks, Toughpad business tablets and electronic point of sales (EPOS) systems. As European market leaders, Panasonic Toughbook had a 66.4% revenue share of sales of rugged and durable notebooks and Panasonic Toughpad held a 50.4% revenue share of sales of rugged business tablets in 2013 (VDC Research, March 2014).

About Panasonic
