

# DIGITAL ASSEMBLIES

by Linkando

## Keeping Business on Track with Digital Meetings

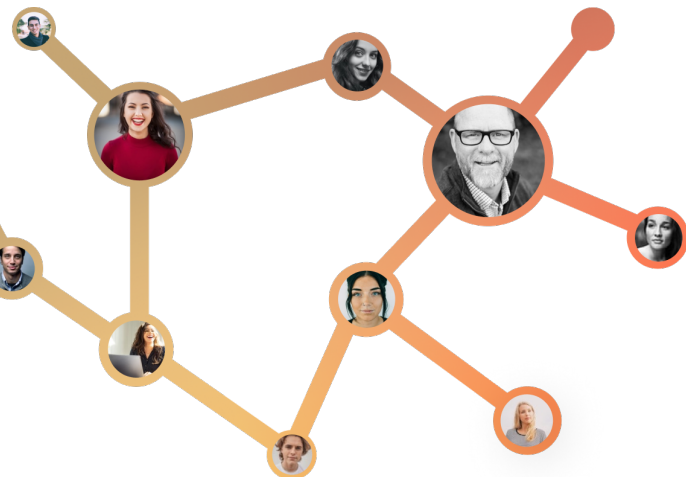

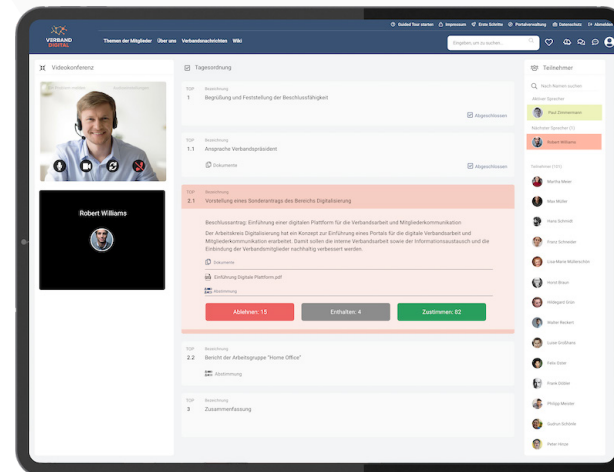

Explore the new solution for formal meetings such as Annual General, Council, Regional or Committee Meetings

The COVID-19 pandemic has restricted our ability to meet in person resulting in delays or cancellations for many formal meetings - now they may be held online! Created to make it as easy as possible for everyone to participate and operate.

### Would you like to hold your digital meetings online?

Then go for it – with our solution, **including a voting tool for elections and polls**, your digital meeting is quickly set up:

- Invite your participants personally to the assembly with an individual link. Only after registration are they allowed to enter the meeting room.
- Post the agenda on the internet in advance.
- Present live to your participants via video transmission.
- Those who wish to contribute can put themselves on the speaking list. The participant is then part of the video transmission for the duration of the speech.
- Conduct elections and votes - even complicated votes with bundling of voting rights, proxy rules or bias can be mapped.
- Book the simultaneous translation option for multinational meetings.
- Make content and results available for download after the event.

### The SaaS-Offering includes:

- Use of the Digital Assembly Premium Platform with integrated tool for elections and voting
- Use of the audio and video conference module

### Additional services can be booked:

- Technical support before and after the event
- Setup of the event portal
- Stand-by remote support during the assembly
- Application Training
- Agenda Preparation
- Trial run of an assembly to learn more about handling of the solution
- Invitation and onboarding of participants
- Follow-up of the results for download (if required)

Contact us to get in touch with our Partner Network to receive your individual portal including the required services!
