Dicom Spigraph announces UK partnership with i2S DigiBook

Based on i2S DigiBook's industry-leading portfolio of book scanners, Dicom Spigraph will provide a full range of digitisation solutions for libraries, public and private archives, museums, universities, government, service bureaus and corporate customers in the UK.

Saint-Quentin-Fallavier, France, 10/02/2015: Spigraph Group (www.spigraph.com), the leading provider of intelligent scanning, capture and document process solutions in EMEA, today announced that it has entered into a sole distribution agreement with i2S DigiBook, a business unit of i2s, to provide digitisation solutions for the UK market based on i2S DigiBook's portfolio of book scanners and software for image capture, image processing and digital library. For over ten years, Spigraph has partnered with i2S across EMEA to deliver innovative, best-in-class solutions for book scanning, heritage & preservation projects, large format scanning and other digitisation projects to customers as diverse as libraries, museums, universities, public and private archives, ministries, service bureaus and corporations.

As the value-added distributor for i2S in the UK, Dicom Spigraph will provide a full range of services to strategic customers and authorised partners, including pre-sales consultancy and project guidance, software integration, end-user training and after-sales service. Customers and partners will also be able to make use of Dicom Spigraph's facilities in their Maidenhead, UK offices for demonstration, testing, and benchmarking capabilities.

"As the European leader in manufacturing image capture systems, our partnership with Dicom Spigraph in the UK is both a natural and a strategic choice" said Alain Ricros, Founder and CEO of i2S, "We have been working with the Spigraph Group for over ten years and they have proven their sales efficiency across many countries. In addition, i2S has several customers and prospects in the UK who believe in our values and technological choices. It is therefore essential for us to ensure their satisfaction by partnering with a local partner, trained according to our high standards."

"Developing the UK market with i2S DigiBook is an important growth step in the long-term relationship between Spigraph and our partner i2S" said Wayne Davey, CEO, Spigraph Group. "We have already delivered over 200 successful projects based on the i2S DigiBook in France, Belgium, Switzerland, the Nordics, North Africa and the Middle East and so we will be bringing a wide range of in-depth experience to future book scanning projects in the UK."
